Sir:

This is in response to the Office Action issued October 2, 2002, wherein restriction of the claims of the above-referenced application is required. The Office Action requires restriction to one of five groups of claims. In response, Applicants provisionally elect Group V (claims 30-34<sup>1</sup>), drawn to a method of screening a substance for the ability to modulate the HDL holoparticle binding and/or internalization activity, with traverse.

Applicants further request that the restriction requirement be reconsidered, because the Examiner has not shown that a serious burden would be required to examine all the claims.

M.P.E.P. § 803 provides:

<sup>1</sup> Applicants note that there is a typographical error on page 2 of the Restriction Requirement, which states that Group V consists of claims 30-24 rather than claims 30-34.

**ATTORNEY DOCKET NO. 19113.0071U2  
SERIAL NO. 09/700,455**

If the search and examination of an entire application can be made without serious burden, the Examiner must examine it on the merits, even though it includes claims to distinct or independent inventions.

Thus, for a restriction requirement to be proper, the Examiner must satisfy the following two criteria: (1) the existence of independent and distinct inventions (35 U.S.C. § 121); and (2) the search and examination of the entire application cannot be made without serious burden. See M.P.E.P. § 803.

In particular, the Examiner has not shown that the second requirement has been met. Specifically, the Examiner has not shown that it would be a serious burden to search and examine the groups together. Because little or no additional burden would be required to search and examine the groups together, Applicants respectfully submit that the groups should be searched and examined together. For these reasons, reconsideration and withdrawal of the restriction requirement is requested.

For the reasons stated above, Applicants respectfully assert that restriction of the claims as set forth by the Examiner would be contrary to promoting efficiency, economy and expediency in the U.S. Patent and Trademark Office (PTO), and further point out that restriction by the Examiner is discretionary (M.P.E.P. § 803.01). Thus, Applicants respectfully request that all of the claims of this application be examined together. Consequently, reconsideration and modification or withdrawal of the restriction requirement is requested.

Enclosed is a Request for a five-month extension of time and Credit Card Payment Form PTO-2038 authorizing payment in the amount of \$1,970.00 to extend the period for response by five months, i.e., to, April 2, 2003. It is believed that no additional fees are due; however, the
